SUMMARY

Computer Engineering student focused on Full Stack Development, with a strong foundation in Java, Data Structures & Algorithms, UI/UX design, and version control using Git and GitHub. Experienced in building practical web projects and integrating frontend interfaces with backend services. Passionate about exploring system design, software architecture, and operating system concepts through personal learning and hands-on experimentation. Seeking opportunities to apply technical and problem-solving skills in real-world software development while continuously learning and building impactful solutions.

EXPERIENCE & PROJECTS

- **CommunityConnect | MERN Stack :-**

[</>]

Developed a community-help platform connecting users with blood donors and local service providers. Implemented JWT authentication, OTP verification, location-based matching, and connection requests. Built responsive interfaces using React, Tailwind CSS, and React Router, with RESTful APIs using Node.js, Express.js, and MongoDB.

- **MR.KEMREWALA | MERN Stack :-**

[</>]

Developed a responsive photography portfolio website showcasing categorized photo collections with modern animations and interactive UI. Implemented a contact system using RESTful APIs and Nodemailer, enabling users to send inquiries directly through the website. Built the frontend with React, Tailwind CSS, ReactBits, and GSAP, with Node.js, Express.js, and MongoDB powering the backend.

- **CodeRoastAI | MERN Stack :-**

[</>]

CodeRoast AI is a fun, AI-powered full-stack project I built to experiment with and test my understanding of React, Node.js, Express.js, REST APIs, AI API integration, frontend-backend communication, environment variables, Git/GitHub, and deployment. The idea was to make code review more entertaining by letting users submit their code and receive an AI-generated roast along with a score, issues, and improvement suggestions. While the project was built mainly for fun and learning, it gave me practical experience in connecting multiple technologies and taking a project from development to a deployed production application.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python (Core)
- **Frontend:** HTML5, CSS3, React.js, Next.js, TailwindCSS, Responsive Web Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB
- **Core Computer Science:** Data Structures & Algorithms (DSA 450+ [LeetCode](#)), Object-Oriented Programming (OOP), Operating Systems (OS)
- **Tools & Technologies:** Git, GitHub, Visual Studio Code (VS Code), IntelliJ IDEA, Figma

EDUCATION

- BTech Computer Engineering (DYPCOE Akurdi) | Savitri Bai Phule Pune University Second Year Student
- XII(state board) | Maharashtra State Board of Secondary and Higher Secondary Education, Pune Board 2025 : 81.17%
- JEE : 92.12%ile | MHT-CET(PCM): 95.85%ile
- X(state Board) | Maharashtra State Board of Secondary and Higher Secondary Education, Pune 2023 Board: 93.00%
